

Logistics Review Template

1) Does your vessel have the required built-in/on-board facilities to undertake the science plan? (i.e. sensors, platforms, lab space, berths)

- Yes, we can support the science directly as it is written
- Maybe, we need more detailed information or have suggestions for other options that would make it possible (*i.e. modified or alternative equipment; fewer berths*)
- No, we cannot support the requirements of this research (*please provide information on the reason for this decision*)

2) Does the requested time frame of the voyage fit in with your vessel schedule?

- Yes
- No, but these are other dates that we can offer
- No
- What are the dates you propose to have this voyage? (Date range or exact date)

3) Can your vessel operate in the requested location(s)?

- Yes
- No, but we can travel to a nearby location (*provide details*)
- No

4) Can the vessel store, deploy or support the additional equipment that will be brought onboard by the user?

- Yes
- Maybe, some modifications may be required (*provide some details, including if there is a cost associated with the modification*)
- No

5) If this project can be accepted on your vessel, do you agree it can be carried out within the amount of ship-time requested (including transit, mob/de-mob and operations)?

- Yes, the amount requested seems appropriate
- Maybe (*Please provide details*)
- No (*Please provide details*)

6) If this project can be accepted on your vessel, what is the likely number of transit days and hours to the area of interest?

- Number of days
- Number of mobilising days including calibration exercises
- Number of weather days added?

7) If this project can be accepted on your vessel, are there other planned voyages that it could be paired with?

- Yes, there are shared options possible (*please provide details below, including if there are cost-efficiencies (i.e. reduced transit)*)
- Yes, there are back-to-back options (*please provide details below, including if there are cost-efficiencies (i.e. reduced transit)*)
- Yes, there are piggy-back options possible (*please provide details below, including if there are cost-efficiencies (i.e. reduced transit)*)
- Maybe (*please provide information if this is dependent on other proposed SWERVE voyages, or other as-yet unconfirmed activities*)
- No, this would be a stand-alone voyage on our vessel with full transit to/from homeport.

Any other comments:

Are there any other issues or concerns you have regarding accepting this project on your vessel? Is there other information you feel is important for the SC to know about?

Can you support this voyage?

This is a yes/no indication only. The SC will understand that any "yes" answer indicated will depend on the details provided in the other columns.
